

Note to File: March 13, 2014

Closure of Inspection Report

This note documents the closing of the Quad-City Drum Recycling (old Rv Hopkins Site) inspection report. The inspection was conducted on 5/7/2012.

Following a discussion with my manager, Donald Toensing, it was agreed that pursuing enforcement would not be a productive option. Don approved the closure of the inspection report, based on the following information:

- The previous owner Mr. Morris Preston was evicted from the Quad-City property.
- The Quad-City property was purchased by a new company.
- The current owners are working with the Corrective Action Branch, to identify the material in drums, properly dispose of the material, abandon the wells and complete the remaining capping requirements.
- New owner plans to build storage units on property when corrective actions are complete.
- And the corrective action branch requested that no action be taken related to the inspection.
